

IMPACT REPORT ON MNCH + GBV RESPONSE

Published date: November 2nd 2024

With support from the TY Danjuma Foundation, we have being able to record the under listed achievements from 2022 to date. Meanwhile, to each activity, herewith are attached physical evidence youtube links of implemented activities

- Equipped and trained at least 30 community leaders as Champions of Family Planning as a Tool for GBV Prevention and Recovery. <https://youtu.be/arIkU44i3b8>

Our Objectives were:

- Policy Integration:** Develop policies that explicitly address the overlap between GBV and family planning.
 - Community Engagement:** Raise community awareness about the links between GBV and family planning, encouraging dialogue and support for survivors.
 - Data Collection:** Use data to understand the prevalence and impact of GBV on family planning outcomes and develop targeted interventions.
- Provided 6 Emergency Transport system (Autorickshaw Ambulance) for underserved communities in Kaduna state as a tool to support MNCH + GBV response, These communities are: <https://youtu.be/yfDK3ZAeY6A>
 - Rafinguza community of Kaduna North LGA
 - Television community of Kaduna South LGA
 - Nasarawa Community of Chikun LGA
 - Narayi community of Kaduna south LGA
 - Farakwai of Igabi LGA
 - Ragasa Community of Igabi LGA

Our Objectives were:

- Stakeholder Engagement:** Involve local leaders, health workers, and GBV response teams to ensure community buy-in and effective coordination.
- Driver Training:** Equip drivers with basic first aid and communication skills to handle MNCH and GBV cases sensitively.
- Referral System:** Develop a clear system for referrals to healthcare facilities, GBV shelters, or law enforcement agencies.
- Monitoring and Evaluation:** Track usage patterns, response times, and outcomes to measure impact and improve services.
- Sustainability Plan:** Establish a cost-sharing model or subsidy mechanism to ensure affordability for underserved populations.

- Sensitize 120 secondary school girls and distribute menstrual hygiene products and GBV education materials to empower women and girls, giving them confidence and reducing their vulnerability to emotional abuse linked to shame or mockery, thus reducing Stigma and Discrimination. <https://youtu.be/ELapcJE8jEA>

Our Objectives were:

- **Policy Integration:** Include menstrual hygiene management (MHM) in GBV prevention and response policies.
 - **Community Education:** Conduct awareness campaigns linking menstrual hygiene to gender equality and GBV prevention.
 - **Accessible Products:** Ensure free or affordable menstrual hygiene products in schools, health centers, and shelters.
 - **Safe Facilities:** Build and maintain safe, private, and gender-sensitive sanitation facilities in public and institutional spaces.
 - **Multi-Sector Collaboration:** Integrate menstrual hygiene promotion into education, health, and GBV response programs.
- FAROF distribute over 5,400 delivery packs to pregnant women with efforts to address Gender-Based Violence (GBV) by supporting maternal health, empowering women, reducing vulnerabilities, and fostering a safe and supportive environment for childbirth. <https://youtu.be/paIYjT5cPjk>

Our objective were:

- **Integration with GBV Response:** Ensure delivery pack distribution is part of a broader maternal health program that includes GBV awareness, prevention, and response.
 - **Community Outreach:** Use distribution events to educate women and families about GBV, its impacts, and available support systems.
 - **Privacy and Safety:** Create discreet and safe processes for distribution, especially in communities where women face stigma or violence related to reproductive health.
 - **Empowerment Messaging:** Include messages in delivery packs that reinforce women's rights to health and safety, and provide contact information for GBV hotlines or services.
 - **Partnerships:** Collaborate with NGOs, health centers, and GBV service providers to maximize impact.
